

S3p – Innovation That Opens Horizons in ThinFilm Coating Technology for Tools and Components

Lucerne, April 10, 2018

Marc Desrayaud – Head of Balzers Industrial Solutions Business Unit

The Bold and The Beautiful

Transcend Technological Limitations with S3p and its BALIQ Coatings: No Limitations, Just Unique Properties

ARC EVAPORATION

+

- ✓ High density, high hardness
- ✓ Excellent adhesion
- Less smooth, droplets

SPUTTERING

+

- Low density, low hardness
- Moderate adhesion
- ✓ Smooth surface

SCALABLE
PULSED POWER PLASMA

COATINGS

Ultra-smooth Surfaces and Exceptional Performance: Being Bold AND Beautiful

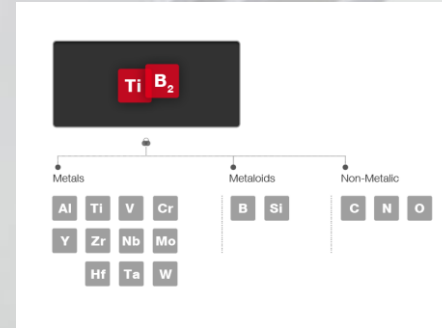

oerlikon

Endless Flexibility in Coating Design to Match the Functional Expectations of Our Customers

ENDLESS POSSIBILITIES
in shaping the coating structure

LARGE VARIETY
of coating materials

Targeting New Markets and Applications: Revolutionary Small Holes

Drilling of microholes in medical applications. Tool life increase:

+400 %

Revolutionary Performance Increase in Key Applications

oerlikon

Milling of steam turbine blades.
Tool life increase:

+90%

Protecting High-demand Precision Components: Revolutionary Increase in Wear Protection

oerlikon

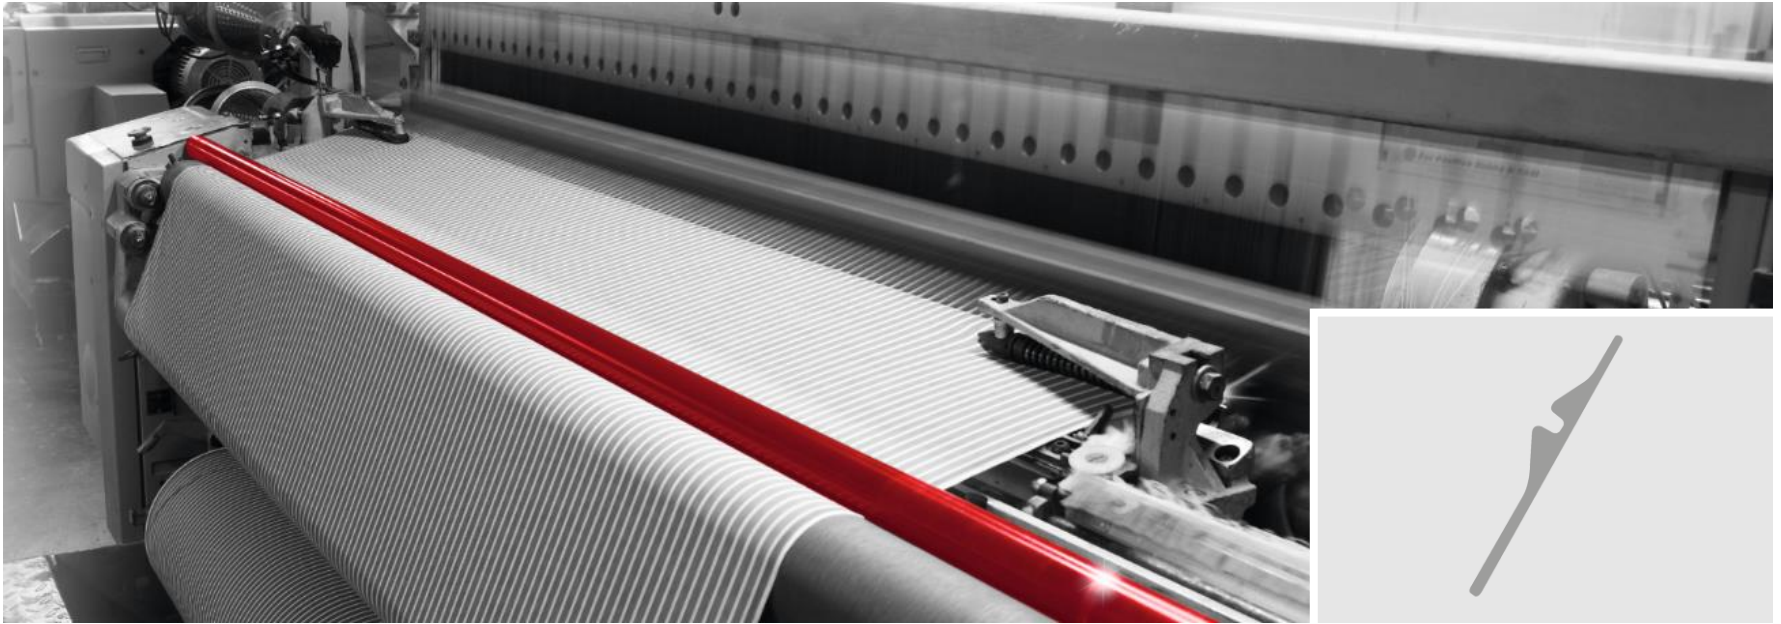

From high-end motorsports to
off-highway vehicles:
protection against abrasive wear

+300 %

Protecting High-demand Precision Components: Revolutionary Increase in Wear Protection

oerlikon

Protection against abrasive
wear during weaving

+300%

Differentiation, Classification and Visualisation with Coloured High Performance Coatings

oerlikon

B A L I

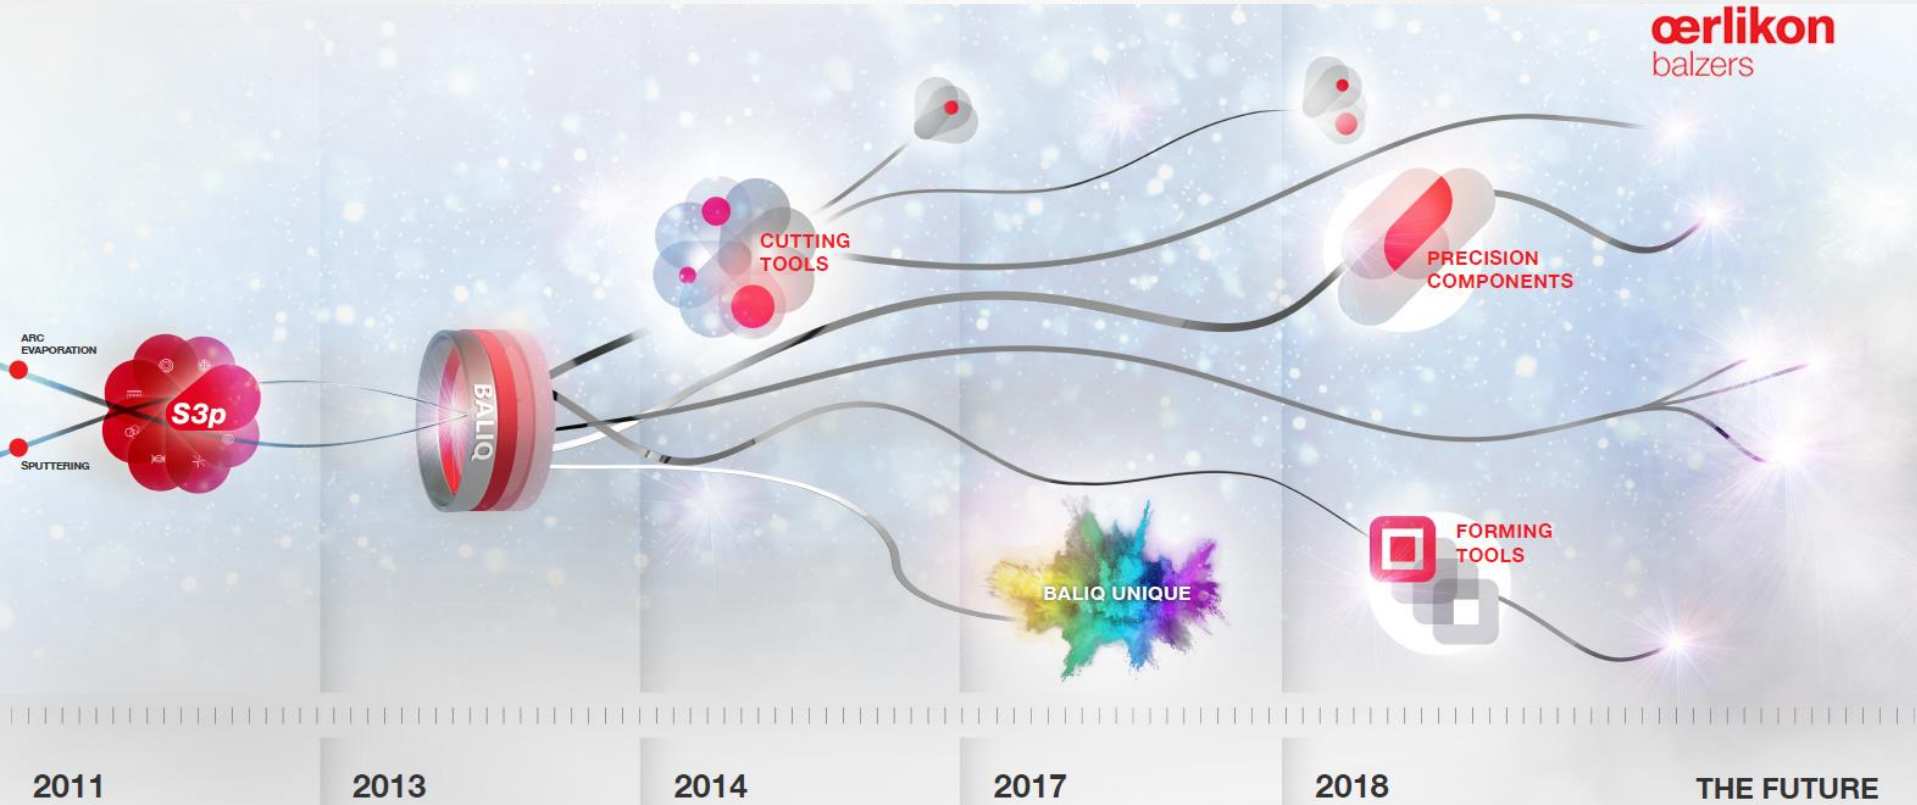

**Differentiate
from
competitors**

Classify products
(e.g. per application,
material, usage)

**Visualize and
indicate tool wear**

oerlikon

Sustainable Enhancement of S3p and more Application-specific BALIQ Coatings

Breakthrough technology as combination of 2 state-of-the-art thin-film coating technologies

Offering new application opportunities to tools and precision components

Potential CHF 500 m new market on top of existing traditional coatings

CHF 500 m

Thank you.
